

## Task 6

### Input:

```
SELECT
    YEAR(InvoiceDate) AS order_year,
    MONTH(InvoiceDate) AS order_month,
    SUM(Quantity * Price) AS total_revenue,
    COUNT(DISTINCT Invoice) AS order_volume
FROM
    online_sales
WHERE
    InvoiceDate IS NOT NULL
GROUP BY
    YEAR(InvoiceDate), MONTH(InvoiceDate)
ORDER BY
    order_year, order_month;
```

### Output:

|   | order_year | order_month | total_revenue | order_volume |
|---|------------|-------------|---------------|--------------|
| ▶ | 2010       | 12          | 390.90        | 4            |

### Input:

```
SELECT
    YEAR(InvoiceDate) AS order_year,
    MONTH(InvoiceDate) AS order_month,
    SUM(Quantity * Price) AS total_revenue,
    COUNT(DISTINCT Invoice) AS order_volume
FROM
    online_sales
WHERE
    YEAR(InvoiceDate) = 2011
GROUP BY
```

YEAR(InvoiceDate), MONTH(InvoiceDate)

ORDER BY

order\_month;

### Output:

|   | order_year | order_month | total_revenue | order_volume |
|---|------------|-------------|---------------|--------------|
| ▶ | 2011       | 1           | 265.80        | 19           |

### Input:

SELECT

YEAR(InvoiceDate) AS order\_year,

MONTH(InvoiceDate) AS order\_month,

SUM(Quantity \* Price) AS total\_revenue,

COUNT(DISTINCT Invoice) AS order\_volume

FROM

online\_sales

WHERE

InvoiceDate IS NOT NULL

GROUP BY

YEAR(InvoiceDate), MONTH(InvoiceDate)

ORDER BY

total\_revenue DESC

LIMIT 3;

### Output:

|   | order_year | order_month | total_revenue | order_volume |
|---|------------|-------------|---------------|--------------|
| ▶ | 2010       | 12          | 390.90        | 4            |
|   | 2011       | 1           | 265.80        | 19           |
